1. Install frame square, level, plumb, and free of twist.

3. To install bottom track, cut to length, then screw at 400mm centres, insure track is level, pack if needed.

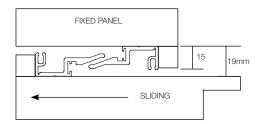

5. Screw rollers into bottom rail. Ensure adjustment screws are facing outwards.

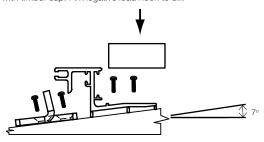

7. Pre Drill and CSK holes for 8g screws at 400mm centres, into top guide track.

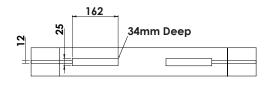

9. Fix interlocker with 8g screws.

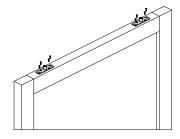

2. Screw down threshold at predrilled centers. Cover back of threshold extrusions, with timber cap. Fix negative load hook to sill.

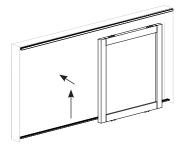

4. Cut mortises into bottom of sliding panel along the centre line of the panel, to insert rollers into. Make smaller channel for access to adjustment screw.

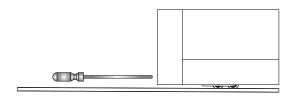

6. Mount top guides onto panel, along the centerline of the panel.

8. Put track onto top guide, then lift and move door onto bottom track.

10. Use adjustment screws to make door run level with the top and bottom tracks. Take the weight off the door while adjusting.
