

1. Install frame square, level, plumb, and free of twist.

2. Screw down threshold at predrilled centers. Cover back of threshold extrusions, with timber cap. Fix negative load hook to sill.

3. To install bottom track, cut to length, then screw at 400mm centres, insure track is level, pack if needed.

4. Cut mortises into bottom of sliding panel along the centre line of the panel, to insert rollers into. Make smaller channel for access to adjustment screw.

5. Screw rollers into bottom rail. Ensure adjustment screws are facing outwards.

6. Mount top guides onto panel along the center line of the door panel. Use M5 Hex Head bolts, tighten middle bolt, but only loosely tighten outer bolts.

7. Pre Drill and CSK holes for 8g screws at 400mm centres, into top guide track.

8. Put track onto top guide, then lift and move door onto bottom track.

9. Fix interlocker with 8g screws.

10. Use adjustment screws to make door run level with the top and bottom tracks. Take the weight off the door while adjusting.

NOTES: Threshold kits

- 12010AL75 for 56mm thick doors.
- 12010AL63 for 44mm thick doors.
- 12010AL84 for 65mm thick doors.

Aluminium finishes Available (All anodized 20mic)

- (Suffix) A = Natural Anodized
- BRZ = Dark Bronze Anodized
- BLK = Black Anodized
